DETAILED ACTION

- 1. Applicant's amendment, filed 11/21/03, reciting newly claimed inventions, has necessitated an additional species election.
- 2. This application contains inventions drawn to patentably distinct species. Applicant is required under 35 U.S.C. § 121 to elect:
- A) a method comprising culturing peripheral blood monocytes, activating dendritic cells (DCs), loading DCs, and forming a pharmaceutical composition,
- B) a method comprising providing DCs with a substance capable of activating a glucocorticoid receptor, activating DCs, providing DCs with an antigen, and obtaining a DC capable of tolerizing a T cell,
- C) a method comprising isolating peripheral blood monocytes, culturing said peripheral blood monocytes, activating DCs, loading DCs, and isolating a DCs,
- D) a method comprising culturing said peripheral blood monocytes, activating DCs, loading DCs, and isolating a DCs, and obtaining a DC capable of tolerizing a T cell,
- E) and list all Claims readable thereon including those subsequently added. Currently Claims 1 and 40-68 are generic.
- 3. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The Inventions comprise different method steps in different combinations and, in particular, they comprise different endpoints. For example, the method of A) includes culturing and loading DCs whereas the method of C) requires isolating monocytes as a first step and DCs as a final step. Note that the methods of B) and D) require a final step of obtaining a DC capable of tolerizing a T cell (a significant limitation not found in the other groups). Therefore, the species are independent and patentable over one another.

4. Applicant is advised that the response to this requirement to be complete must include an election of the species to be examined even though the requirement be traversed.

Serial No. 09/666,430 Art Unit 1644

- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (703) 308-9805 The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973.
- 6. Please Note: Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
